# Appendix B: PRISMA Flow Diagram

#### First Database Search

# Primary Keyword Search: "sustainab and worldview"

References identified through database searching (n = 696)

References after subject areas excluded\* (n = 548)

References combined (n = 1,240)

Duplicates removed (n = 294)

Abstracts resulting in codes (n = 789)

These PRISMA Flow diagrams represent two sets of database searches. The first represents the baseline keyword search as indicated in Step 1 of Table 1: Methodology Overview in the paper. The second database search, Step 3 of Table 1, contains four keyword word searches that represent the least frequent codings in the abstracts of the first baseline search.

#### **Second Database Search**

### Secondary Keyword Search: "sustainab and regenerative"

References identified through database searching (n = 1,224)

References after subject areas excluded\* (n = 314)

References combined (n = 733)

Duplicates removed (n = 263)

Abstracts resulting in codes (n = 29)

## Secondary Keyword Search: "sustainab and relational thinking"

References identified through database searching (n = 96)

References after subject areas excluded\* (n = 86)

References after subject areas excluded\* (n = 112)

References combined (n = 198)

Duplicates removed (n = 91)

Abstracts screened (n = 101)

## Secondary Keyword Search: "care" and "posthuman"

References identified through database searching (n = 110)

References after subject areas excluded\* (n = 33)

References combined (n = 59)

Duplicates removed (n = 4)

Abstracts screened (n = 55)

Abstracts resulting in codes (n = 5)

## Secondary Keyword Search: "sustainab and mindfulness"

References identified through database searching (n = 313)

References after subject areas excluded\* (n = 190)

References combined (n = 476)

Duplicates removed (n = 256)

Abstracts resulting in codes (n = 22)
